Introduction

What does it do?

This extension adds a default configuration to the tsConfig of all backend users.

The current configuration effects:

- All backend users will have an admin panel in the frontend
- All backend users will have page uids in the page tree of the backend.

Quick Install

Install this extension.

Default Configuration

```
// Adding the admin panel to users
admPanel {
  enable {
    edit = 1
    preview = 1
    cache = 1
  }
  hide = 0
}

// Display page tree with page ids
options {
  pageTree {
    showPageIdWithTitle = 1
  }
}
```

Adapting the default configuration to your needs

Please change the configuration in `ext_tables.php`.

Helpful suggestions
